

INTERNET SPEEDS IN THE NORTH EAST UNITED STATES

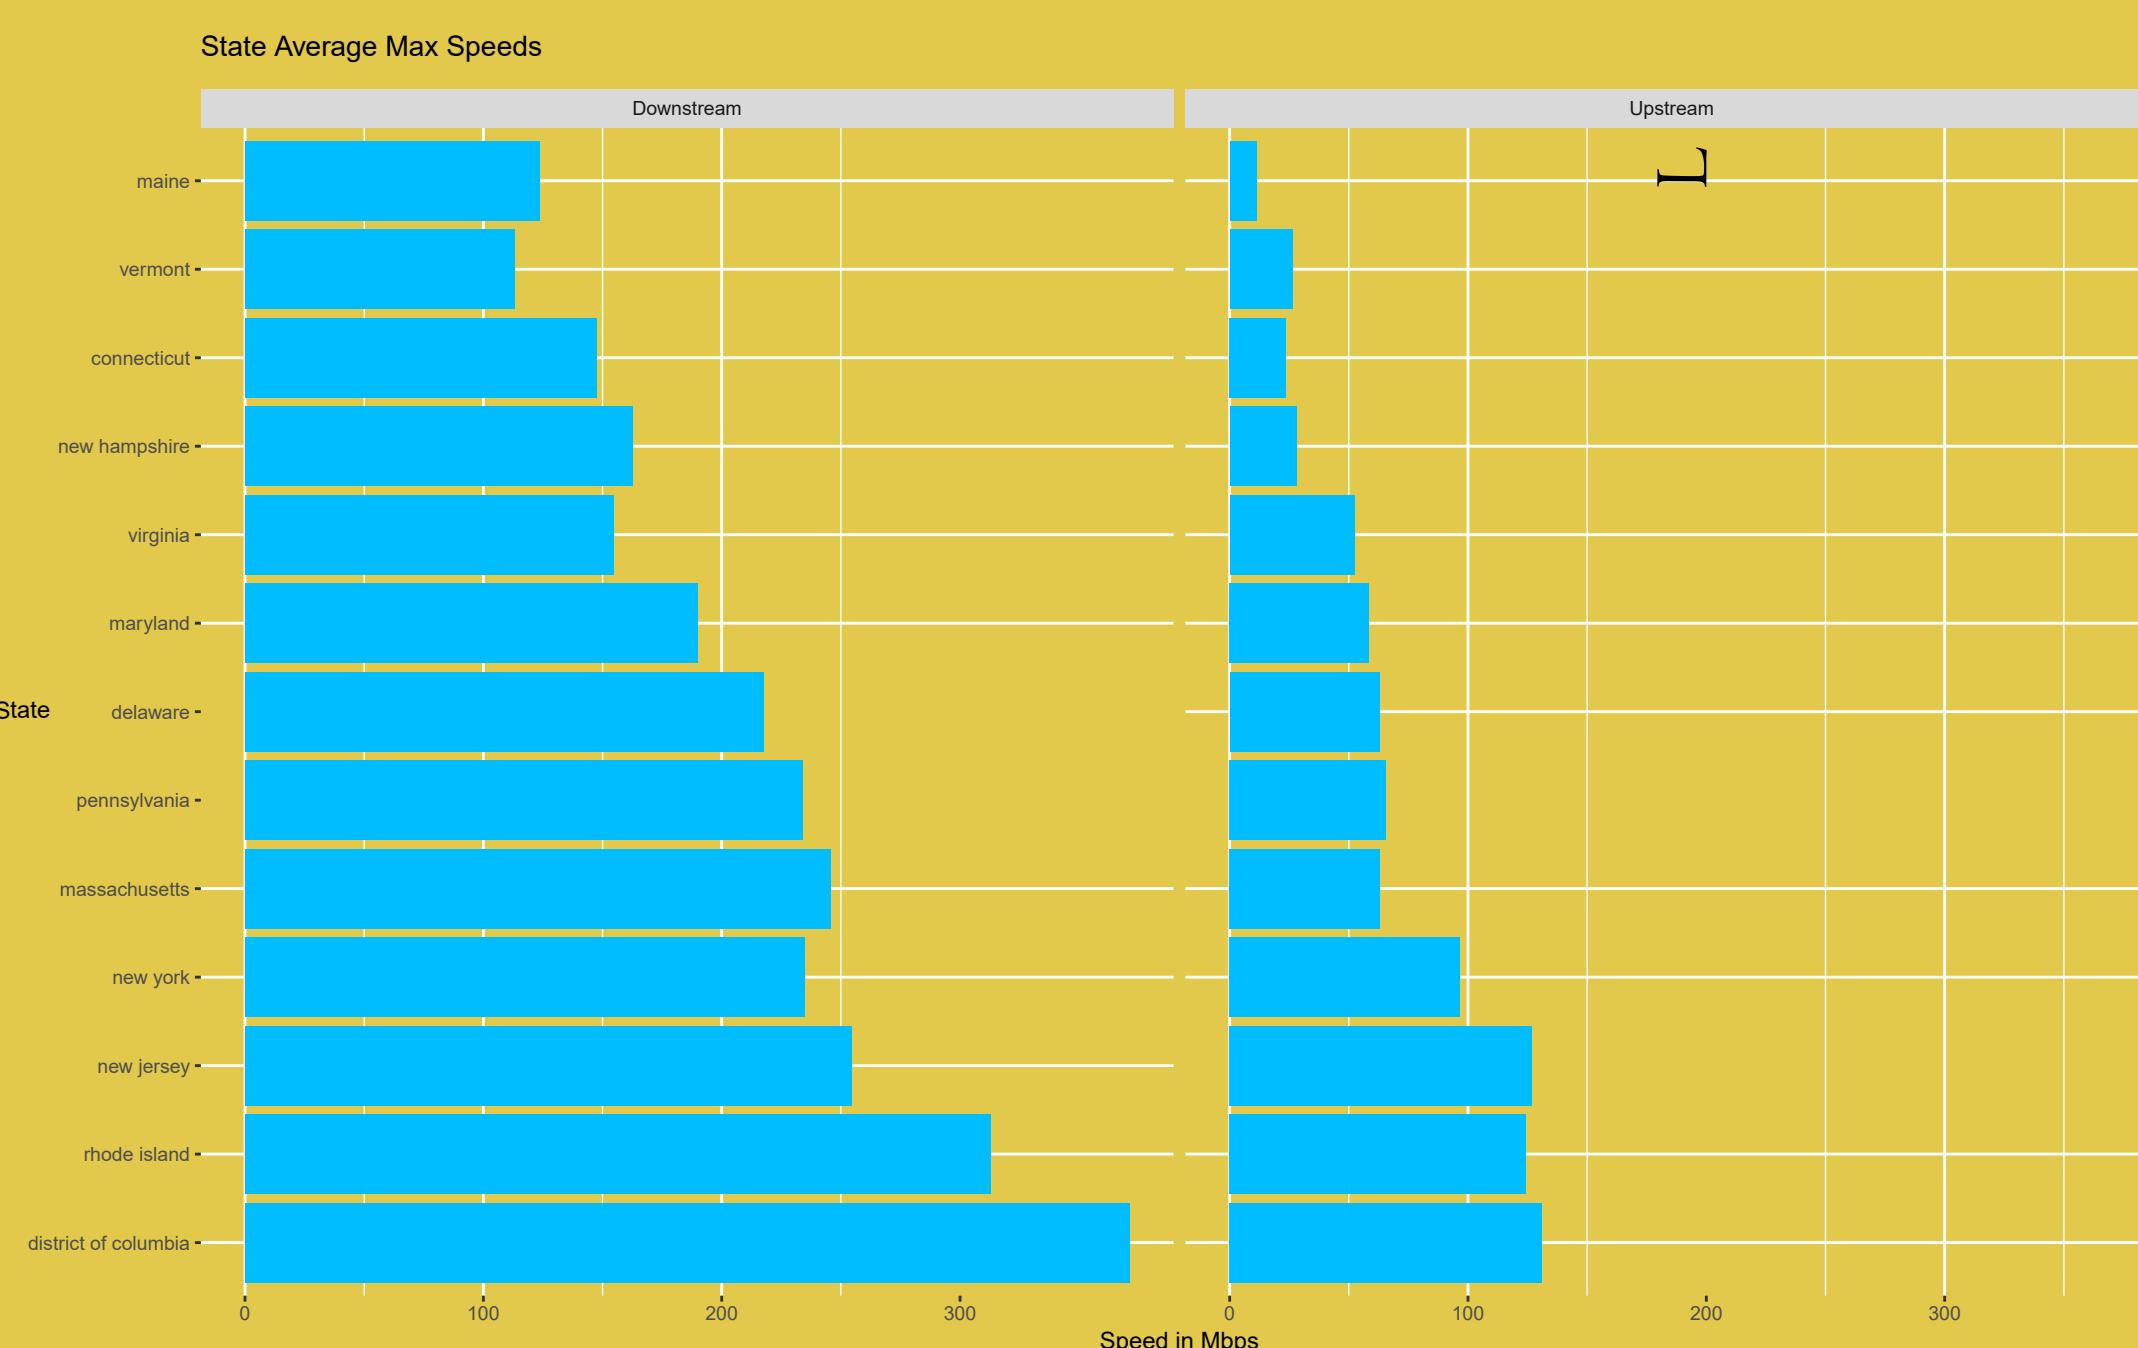

Kyle Walter

IST719

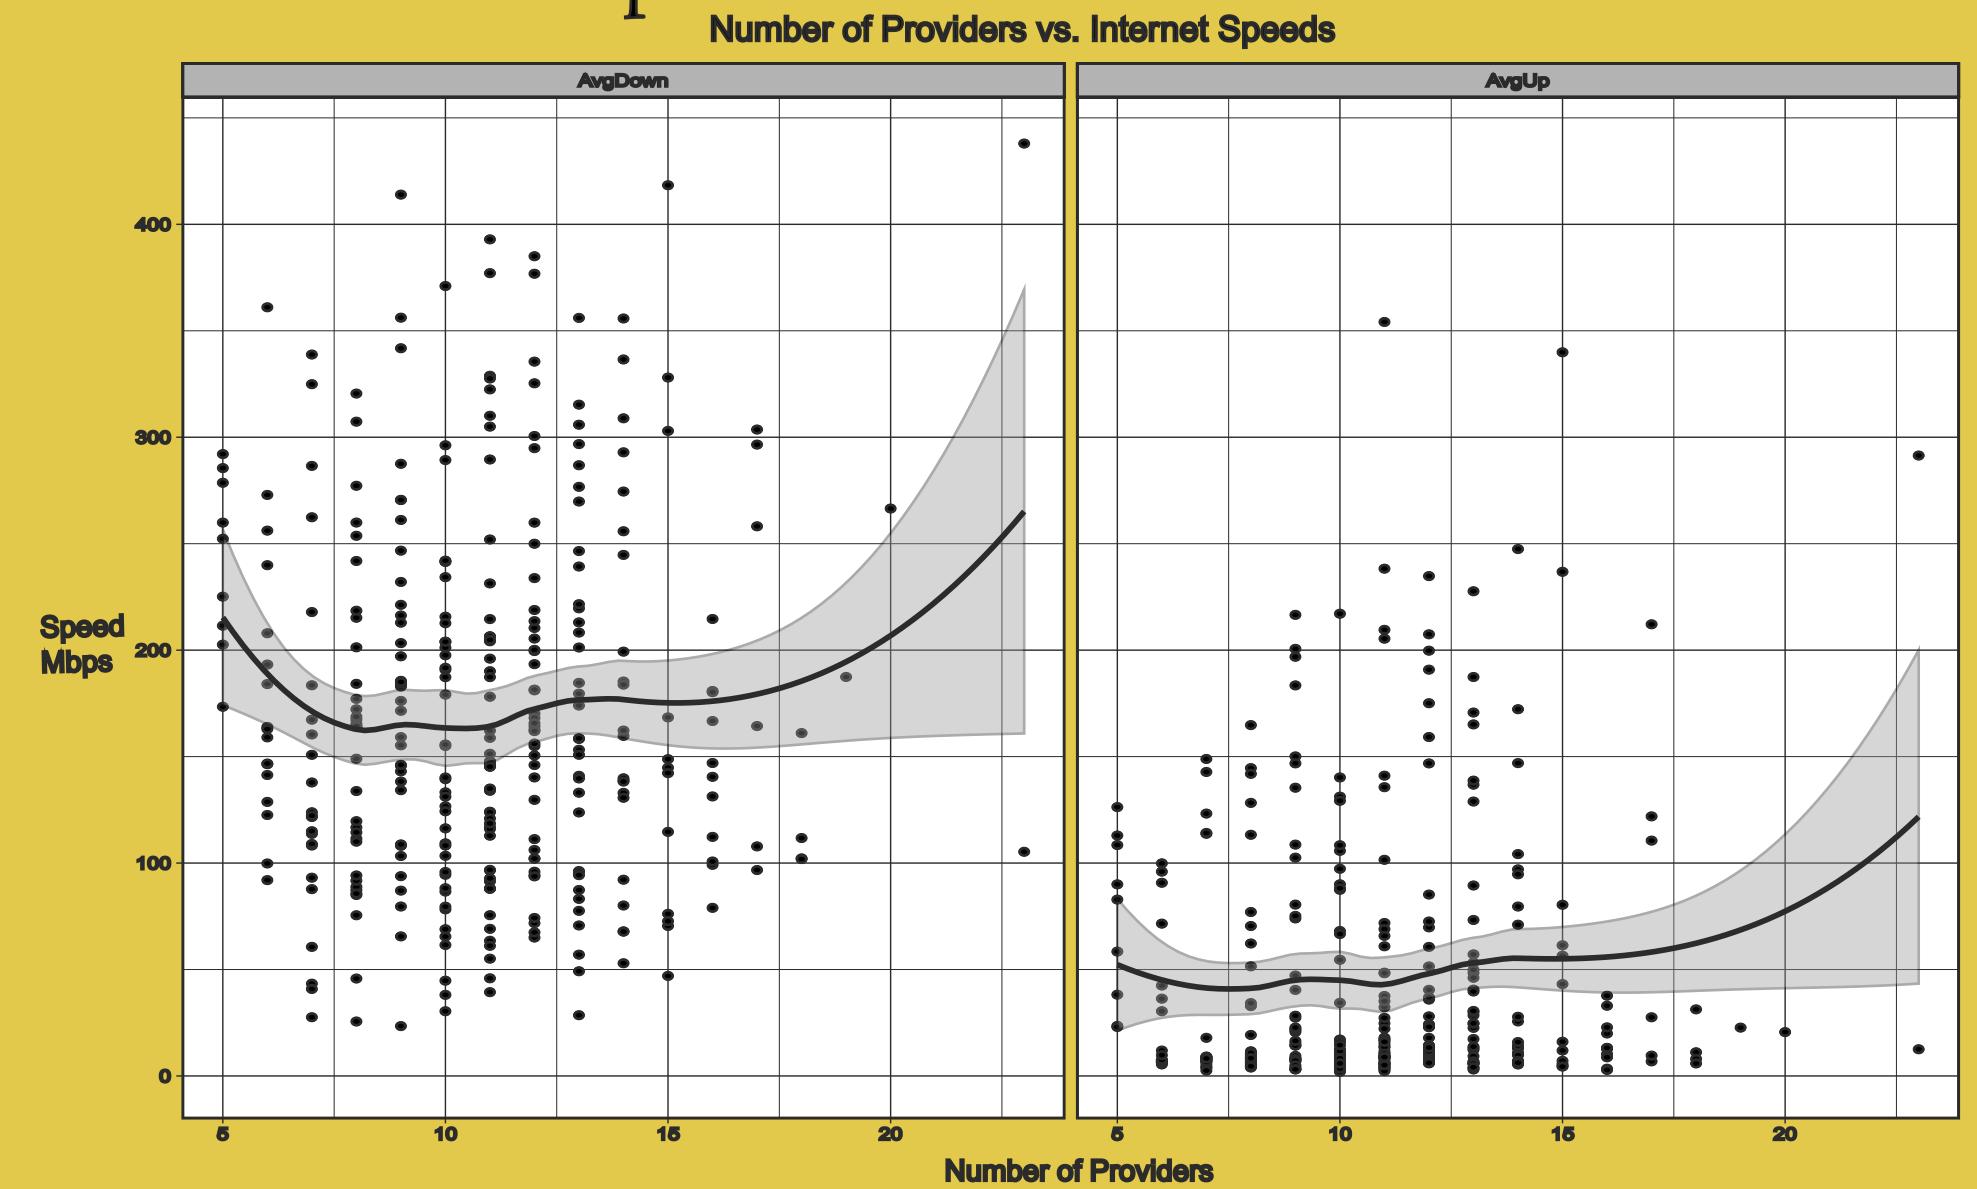

With more people working from home due to the covid-19 pandemic, internet connectivity is more important at home than ever. As people look for more space where according to the FCC's data can they also find the optimal internet connection?

This poster uses the FCC's April 2021 report on the Internet Broadband speeds in each advertised Census tract. It contains 15 columns and 73 million records. It has been subset to look at consumer internet speeds and looks at the North Eastern US. It should help those relocating to or within the North East find the location with the best speeds for household internet.

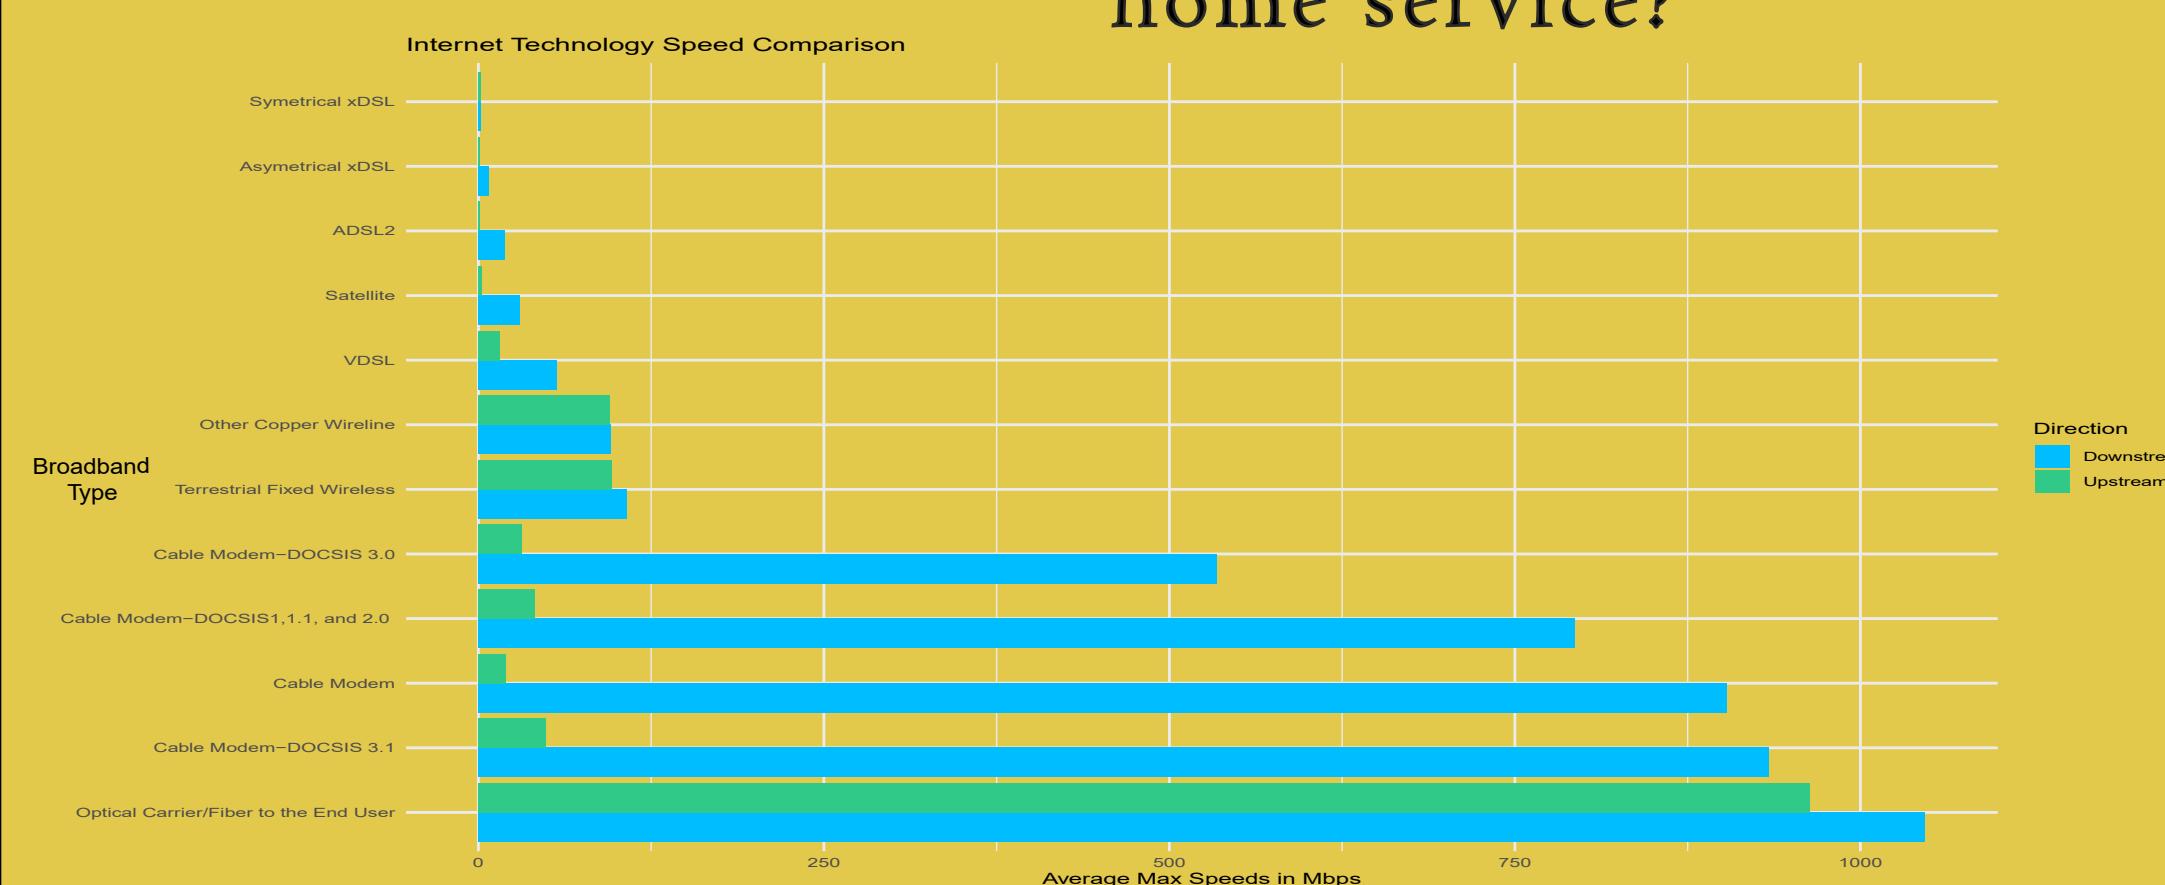

Which state has the fastest speeds?

Does competition play a role in consumer internet speeds?

Which Technologies employed are best for home service?

So where is the best place to live?
